

We are now looking for cooperation opportunities with large medical device companies, who are intended to expand China market. We are the market leader in the field of biomaterials / dura regeneration in China, and we have built up a good reputation in the Neurosurgery. Your contact is welcome.

Beijing TianXinFu Medical Appliance Co., Ltd. is a high-tech enterprise which integrates research, development, production and sales together. It mainly provides two kinds of implantable medical devices (type III) - regenerative medical biomaterials and orthopedic implants. The biomaterial products include DuraMax, DuraGide and Artificial Nerve, while the orthopedic products are primarily Artificial Hip Replacements and Spine Internal Fixation System.

Founded in 2002, TianXinFu is motivated by R&D, oriented by market, based on manufacture, and developed on innovation. It pursues cutting-edge technology and aims at improving human life quality and well-being. With the sophisticated application of tissue engineering technology, it developed an absorbable collagen scaffold used for tissue regeneration and registered as "Dura Implants" in 2003, which was the earliest Dura implant product in China. Since its announcement, Dura Implants has been widely used in the predominant hospitals in China and obtained significant attention and valuable approval from surgeons. In 2009, the Dura Implants were granted the *Certificate of Product with Independent Innovation*, in addition to the support from the Beijing Innovation Funds.

TianXinFu possesses a production base of 6,800 mm<sup>2</sup> at the Changping Science Park, with Class 10,000 and 100,000 clean workshops and R&D laboratories, as well as state of art production and inspection equipments. Meanwhile, it builds up Quality Management System and After-sales Service System according to ISO9001, ISO13485 and *Good Manufacturing Practice for Medical Apparatus and Instruments (for Trial Implementation)*. Moreover, it has a mature distribution network covering thousands of hospitals in all provinces of Mainland China. In TianXinFu, there are 150 employees, led by a professional and efficient management team of high qualifications.

The quality policy that TianXinFu insists on is To Make Everything Perfect as Implanted in Our Own Body. It has served patients for more than ten years and trained lots of medical elites in the area of R&D, sales and production for China medical industry. Till now, TianXinFu has successfully received dozens of patents. Based on its technology advantage on biomaterials and rich experience on orthopedics, TianXinFu is devoting itself to high-quality product development, thus serving as a reliable and competitive medical device company with the renowned national brand.

If you are interested to expand China market with a leading company in Neurosurgery, please contact Sandy Zhi by email by phone.
